

WARNING!

The Numbers Are Against You

407,606 = number of fires caused by home electrical problems
3,406 = number of deaths caused by electrical problems
\$7,858,700,000 = property damage caused by electrical problems each year
(Source: U.S. Fire Administration's Fire in the United States, 1992-2001)

"Each year, hundreds of homes and families succumb to hidden but very real dangers that destroy property and lives."

Vernon T. Houchin - Retired Captain, St. Louis Fire Department

You Don't Have to be a Statistic!

Announcing a convenient and affordable way to ensure that your home and the safety of your family are protected from the dangers of electrical problems.

How Safe is Your Home?

1. Is your home more than 40 years old?
2. Has your home had a major addition or renovation or major new appliance added such as a refrigerator, freezer, air conditioner, or electric furnace in the last 10 years?
3. Are you the new owner of a previously owned home?
4. Do your lights flicker or dim momentarily?
5. Do your circuit breakers trip or fuses blow often?
6. Are your outlet and light switch face plates hot to the touch or discolored?
7. Do you hear cracking, sizzling or buzzing from your outlets?
8. Do you have extension cords and multiple power strips permanently in use around the house?

If you answered "yes" to any of these questions, it is highly recommended that you have a Safety Power Audit

Plug into Quality.

Safety Power Audit

~~\$199.99~~

\$ 99.00
